

C program to implement Merge sort

Algorithm

1. Start
2. Input array
3. $j = i$
4. for $i = 1$ to $i = n - 1$
 while ($j > 1$ & $a[j] < a[j - 1]$)
 if ($a[j] < a[j - 1]$) then
 temp = $a[j]$
 $a[j] = a[j - 1]$
 $a[j - 1] = temp$, $j = j - 1$
5. Output sorted array
6. Stop

Flowchart
